

CLAIMS

1. A nanoscale self-aggregate comprising O-glycoside type oligolipid having a structure represented by the general formula (1) shown below.

(In the formula, G represents an oligosaccharide radical composed of two to thirty monosaccharides, and R represents a hydrocarbon group containing six to twenty-five carbon atoms.)

2. The nanoscale self-aggregate as in Claim 1 wherein the hydrocarbon group (R) is located in a meta position relative to the -O-G group in the general formula (1).
3. The nanoscale self-aggregate as in Claim 1 or 2 wherein the oligosaccharide is a disaccharide.
4. The nanoscale self-aggregate as in any one of Claims 1-3 wherein the oligosaccharide is lactose.
